### CLASS I

1. Execute work by methods to minimize raising dust from construction operations.
2. Immediately replace any ceiling tile displaced for visual inspection.
3. Cleanup and disposal in accordance with defined procedures.

### CLASS II

1. Continue Class I requirements
2. Provides active means to prevent air-borne dust from dispersing into atmosphere
3. Water mist work surfaces to control dust while cutting.
4. Seal unused doors with duct tape.
5. Block off and seal air vents.
6. Wipe surfaces with approved disinfectant.
7. Contain construction waste before transport in tightly covered containers.
8. Wet mop and/or vacuum with HEPA filtered vacuum before leaving work area. **Vacuum Personnel if needed.**
9. Place dust mat at entrance and exit of work area.
10. Remove or isolate HVAC system in areas where work is being performed.

### CLASS III

1. Continue Class I & II requirements
2. Obtain infection control permit before construction begins.
3. Isolate HVAC system in area where work is being done to prevent contamination of the duct system.
4. Complete all critical barriers or implement control cube method before construction begins.
5. Maintain negative air pressure within work site utilizing HEPA equipped air filtration units.
6. Seal holes, pipes, conduits, and punctures appropriately.
7. Do not remove barriers from work area until complete project is thoroughly cleaned.
8. Vacuum work area with HEPA filtered vacuums including **Personnel, if needed.**
9. Wet mop with approved disinfectant
10. Remove barrier materials carefully to minimize spreading of dirt and debris associated with construction.
11. Contain construction waste before transport in tightly covered containers.
12. Cover transport receptacles or carts. Tape covering.
13. Remove or isolate HVAC system in areas where work is being performed.

### CLASS IV

1. Continue Class I, II & II requirements
2. Obtain infection control permit before construction begins.
3. Isolate HVAC system in area where work is being done to prevent contamination of duct system.
4. Complete all critical barriers or implement control cube method before construction begins.
5. Maintain negative air pressure within work site utilizing HEPA equipped air filtration units.
6. Seal holes, pipes, conduits, and punctures appropriately.
7. **Construct anteroom and require all personnel to pass through this room so they can be vacuumed using a HEPA vacuum cleaner before leaving work site or can wear cloth or paper coveralls that are removed each time they leave the work site.**
8. **All personnel entering work site are required to wear shoe covers**
9. Do not remove barriers from work area until completed project is thoroughly cleaned.
10. Vacuum work area with HEPA filtered vacuums.
11. Wet mop with approved disinfectant.
12. Remove barrier materials carefully to minimize spreading of dirt and debris associated with construction.
13. Contain construction waste before transport in tightly covered containers.
14. Cover transport receptacles or carts. Tape covering.
15. Remove or isolate HVAC system in areas where work is being done.

### Additional Requirements: Contact Infection Prevention/Clinical Epidemiology Unit if scope of the project changes
